ELKAY®

Case Study - Software Robot Performs Cash Reconciliation in General Ledger and Cash Management

Software robot performs Cash reconciliations in E-Business Suite Financials and creates adjusting journal entries completely unattended, using Robotic Process Automation (RPA) technology.

Ashwin Bodalia
Manager, Enterprise Systems
Elkay Manufacturing

Agenda

- Introductions
- What you will take away from this presentation
- About the Company
- The Business Challenge
- Robotic Process Automation (RPA)
- Starter Kit - An easy way to begin
- The Cash Reconciliation Process
- Seeing is believing - Software Robot in Action
- Implementation Approach, Success Factors
- Lessons Learned
- Going forward

Ashwin Bodalia

Manager, Enterprise Systems
Elkay Manufacturing

Brent Harders

Sr. Manager, Enterprise Systems
Elkay Manufacturing

Ramesh Kumar

CEO & Founder
eAlliance Corporation

Glenn Hoormann

Executive Vice President
eAlliance Corporation

What you will take away from this presentation

- Understand - What RPA is and why the explosive growth?
- Understand - Automation affecting the back office, specifically finance & accounting
- Understand - RPA can emulate what a user does manually
- Demonstrate - Complex transaction being performed by an unattended software robot
- Differences - RPA vs traditional IT projects
- Explain - RPA does NOT require API's

About the Company - Elkay Manufacturing

- Established in 1920
- Headquartered in Oak Brook, IL
- Over 2,300 Employees around the Globe
- Serving Customers for
 - Plumbing
 - Commercial & Industrial
 - Retail and Foodservice
- 15 locations worldwide
- Family Owned & Privately held
- America's No. 1 selling kitchen sink company

ELKAY®

Drinking Solutions

Clean. Safe. Reliable.

Elkay's broad line of water delivery products includes water coolers, fountains, bottle filling stations and water purification systems. These various products have been installed all over the world to deliver clean and safe water to end users.

Sinks, Faucets, CIS

Enduring Quality. Superior Craftsmanship. Timeless Style.

Our sinks, faucets and accessories are designed to last. Outstanding materials are crafted with precision to give your project a timeless touch. Endless options will spark your imagination and create a space that effortlessly complements your home's décor.

Smartwell Product Overview

ONE SMART SYSTEM

SAVE MONEY, SPACE, TIME

Save the cost of single-serve beverages.
Save precious storage space and time.

ECO-FRIENDLY

Multiuse pouches reduce waste
from single-use plastic bottles and
aluminum cans.

HEALTHY HYDRATION

Provides fresh, filtered water, with
zero calorie, natural flavors and
sweetener – a healthy alternative
to high-calorie, sugary beverages.

TOUCH SCREEN INTERFACE

Intuitive touch screen is
simple to operate.

WATER YOUR WAY

Still water or sparkling water
with single or mixed fruit
flavors; electrolyte, vitamin C
or caffeine enhancements.

SMART REFILL

Connected system sends alerts
when flavors and enhancements
are low and ships replacement
pouches as needed.

Elkay - 2019 Corporate Goals & Initiatives

- Recurring Revenue
- Global Water Delivery
- Digital Transformation
 - Manufacturing 4.0
 - RPA, AI & Machine Learning

Elkay – The Business Challenge

- Tribal knowledge
- Aging workforce
- Employee turnover
- Millennial workforce
- Growth
- Focus on customer interaction/ service

eAlliance Corporation

- Established in 2002
- Headquartered in Naperville, IL
- Oracle Certified Partner
- UiPath Certified Partner & Reseller
- Market leading RPA & CDA Partner
- Proprietary RPA Methodology

The Washington Post

What is Robotic Process Automation (RPA)?

- Software that can
 - Create, copy, update, transfer (FTP) & delete any type of file
 - Enter transactions, run reports, send & receive email
 - Log into any system, application or portal
 - Screen scrape, data scrape
 - Differentiating features of RPA
 - AI Capabilities
 - Machine Learning Capabilities
 - Natural Language Processing (NLP) Capabilities
 - Internet of Things (IoT) Capabilities

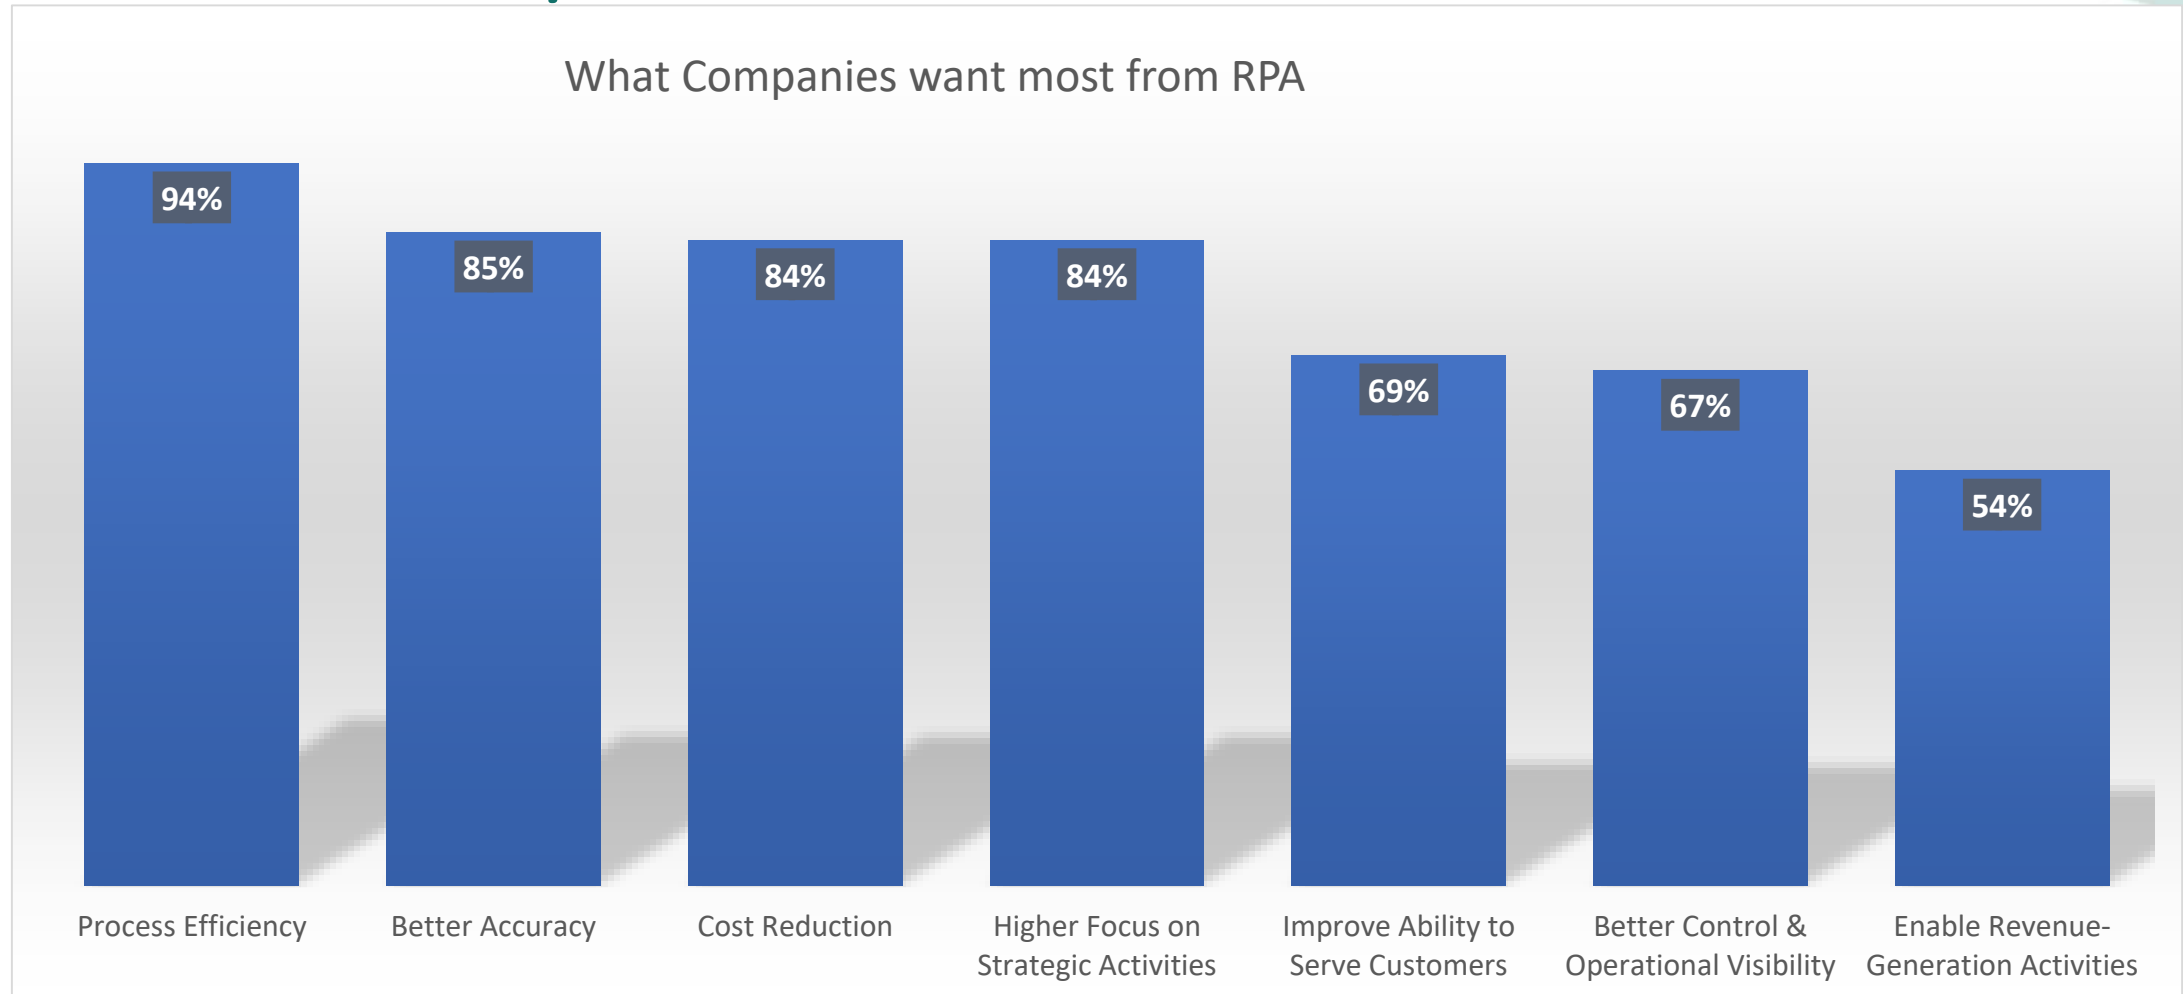

Why the Explosive Growth?

- Process Efficiency
- Workforce Capacity
- Measurable Returns
- No Disruption to IT Infrastructure
- Quick time to market
- Changes in the Workforce - The Employee Experience

The average company has 900+ business processes. 85% of those can be automated.
- McKinsey Company, 2015

Process Efficiency

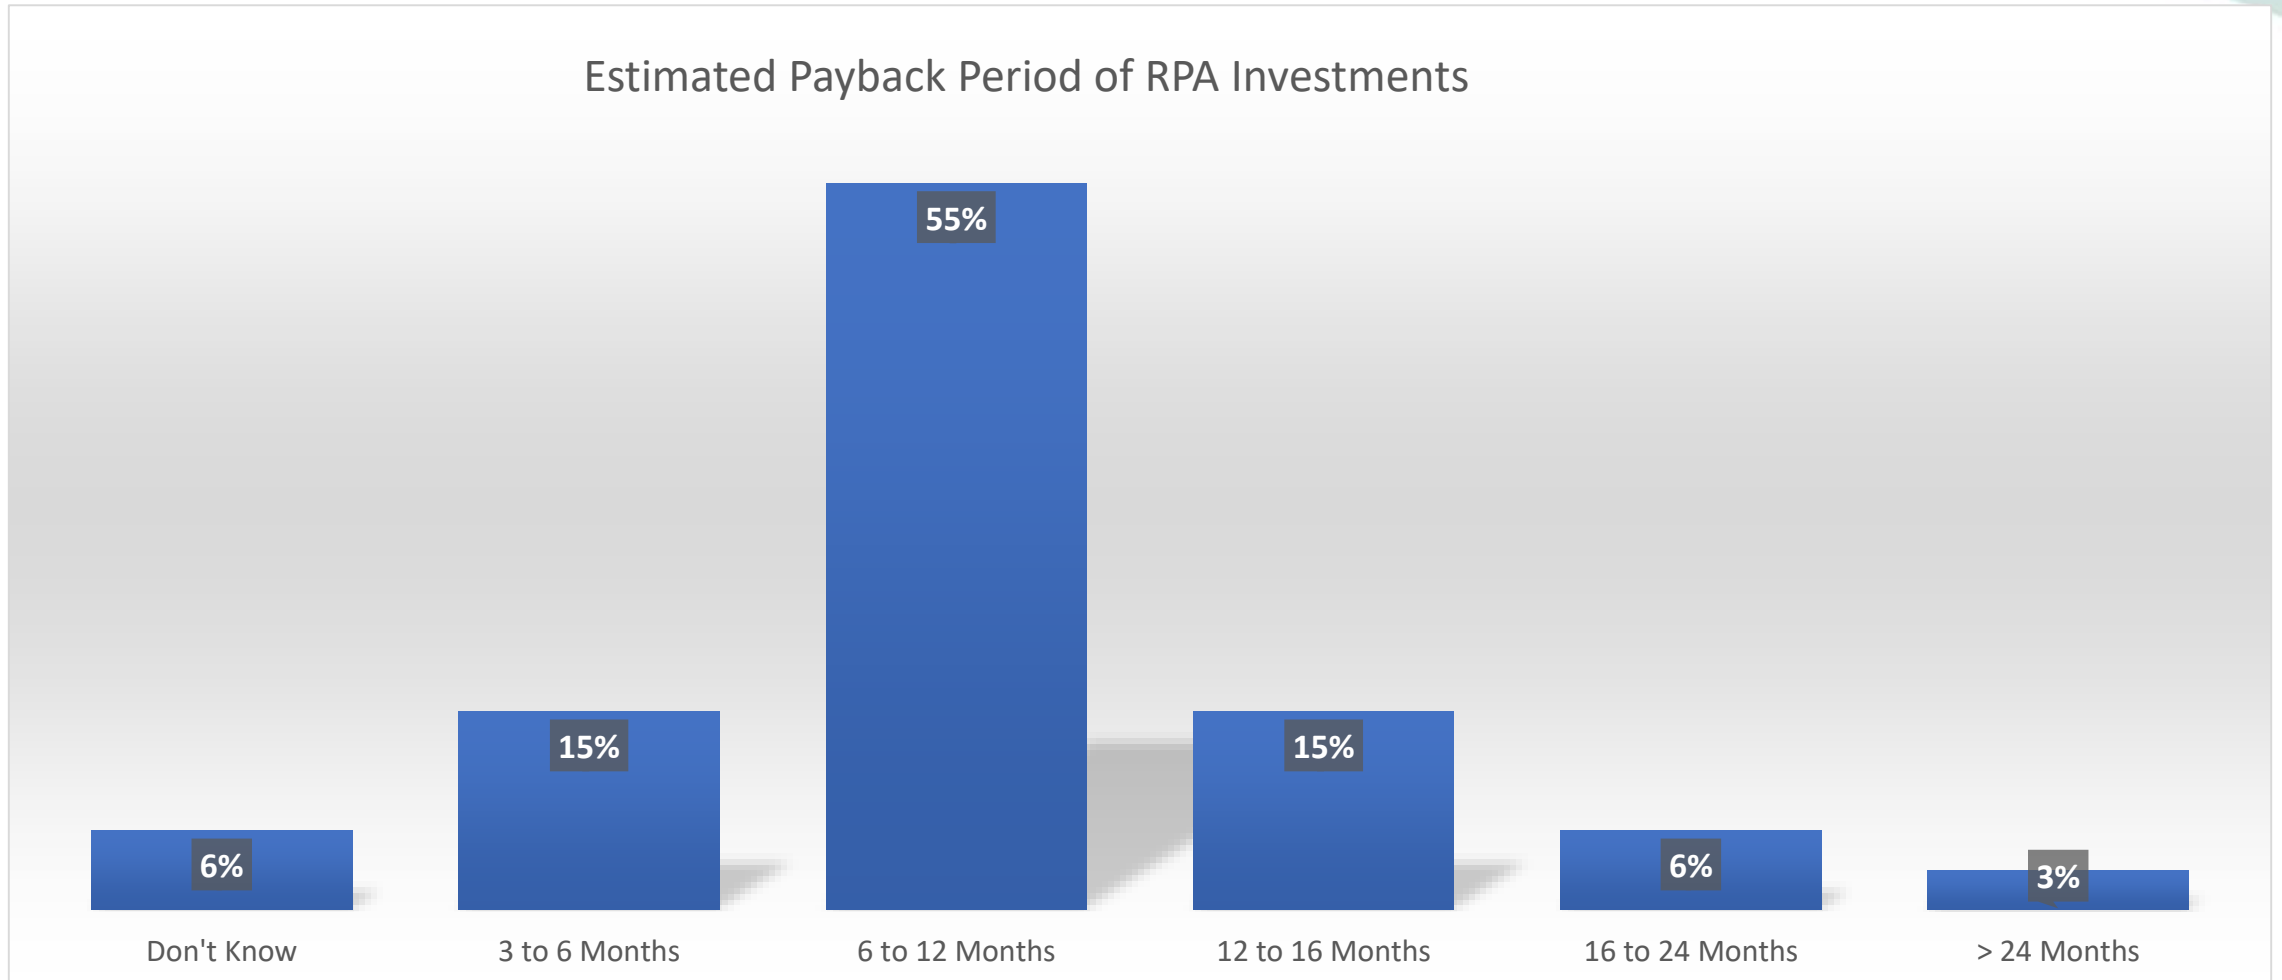

Workforce Capacity

- Meeting increasing demand from growth and volume
- Filling a workforce capacity gap from turnover and retirement

The 37 Percent Mystery: Where Did All the Workers Go?
- Derek Thompson, *The Atlantic*

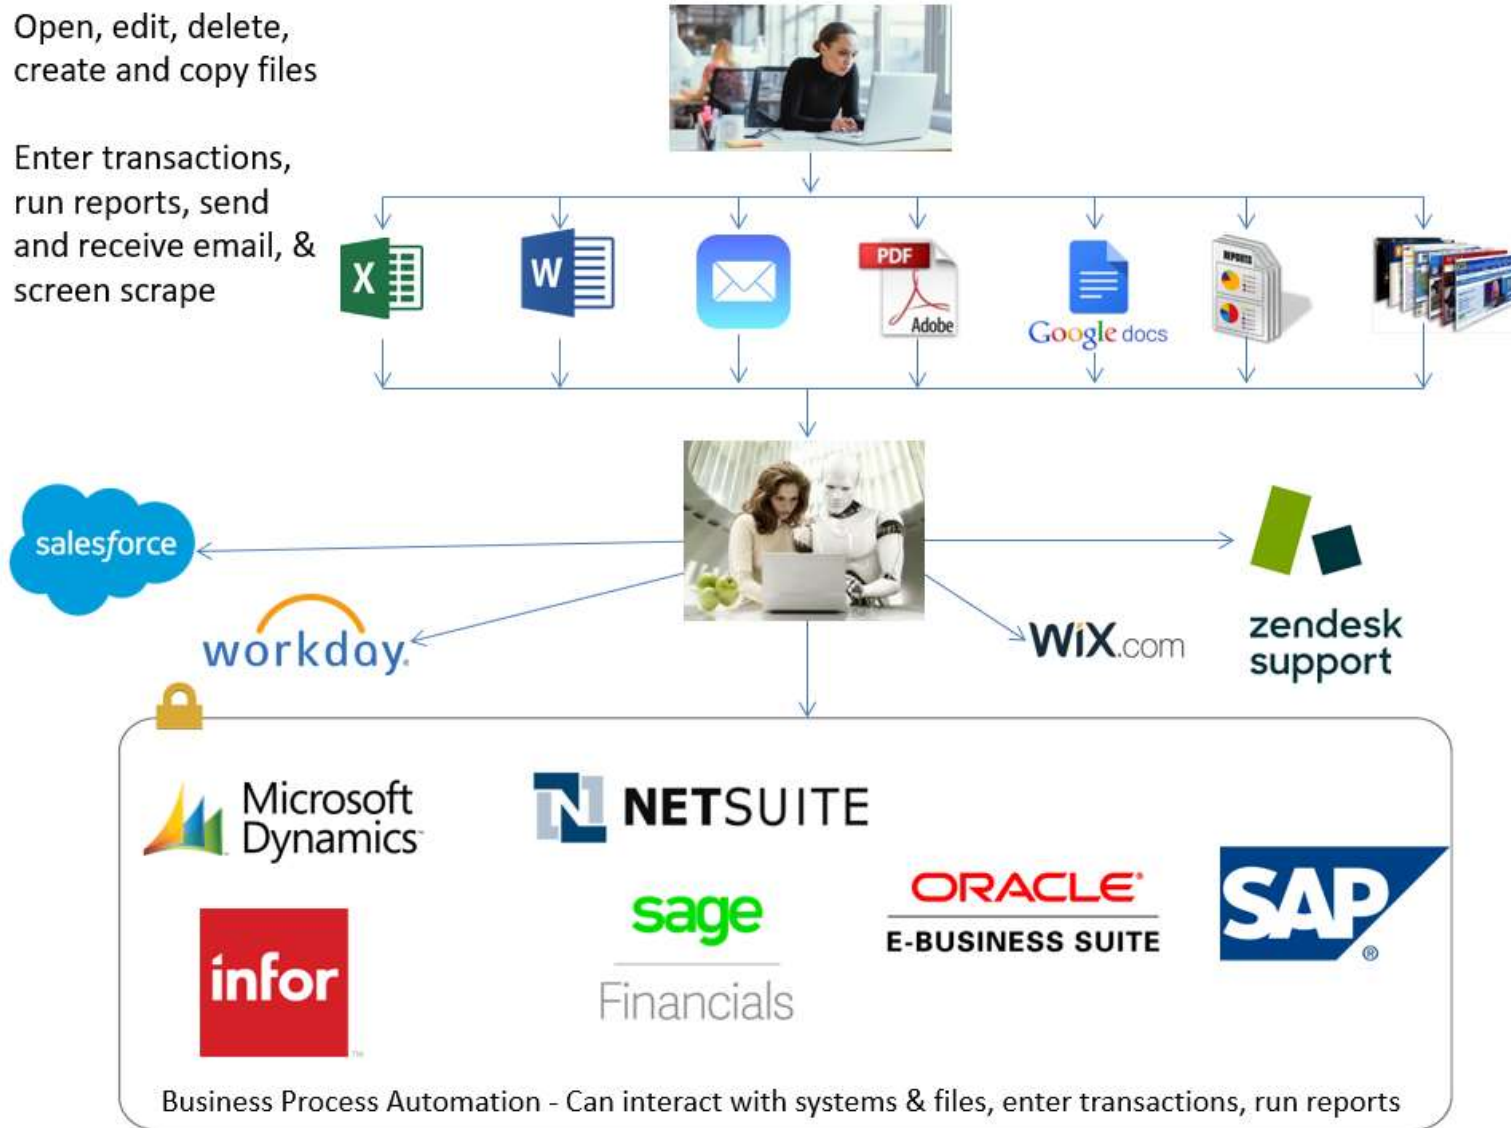

Measurable Results

No Disruption to IT Infrastructure

Open, edit, delete,
create and copy files

Enter transactions,
run reports, send
and receive email, &
screen scrape

Quick Time to Market

- UI Tools with Record & Workflow capabilities
- No customization to existing applications
- Software robot is just another user
- No code, low code technology

Figure 1: RPA compared to traditional process transformation approaches

Changes in the Workforce - The Employee Experience

- Employees today struggle to perform under the weight of mind-numbing, repetitive work. They're influenced by their consumer experiences and want similar experiences in their jobs.
- **Employee experience must take center stage:** Sixty-six percent of respondents said that RPA restructures existing work, enabling employees to have more human interactions, and 60 percent said RPA helps employees focus on more meaningful, strategic tasks. In addition, 57 percent of respondents report that RPA reduces manual errors.

Starter Kit - An easy way to begin

One Year UiPath Software Subscription & eAlliance RPA Managed Services

- Automation Planning Workshop
- Automation ROI Scorecard
- One Automated Business Process
- Administration & Ongoing support of automation environment
- Automation HelpDesk System
- ROAR (Robotic Operations & Audit Reporting)
- Automation Center of Excellence
- Automation Roadmap

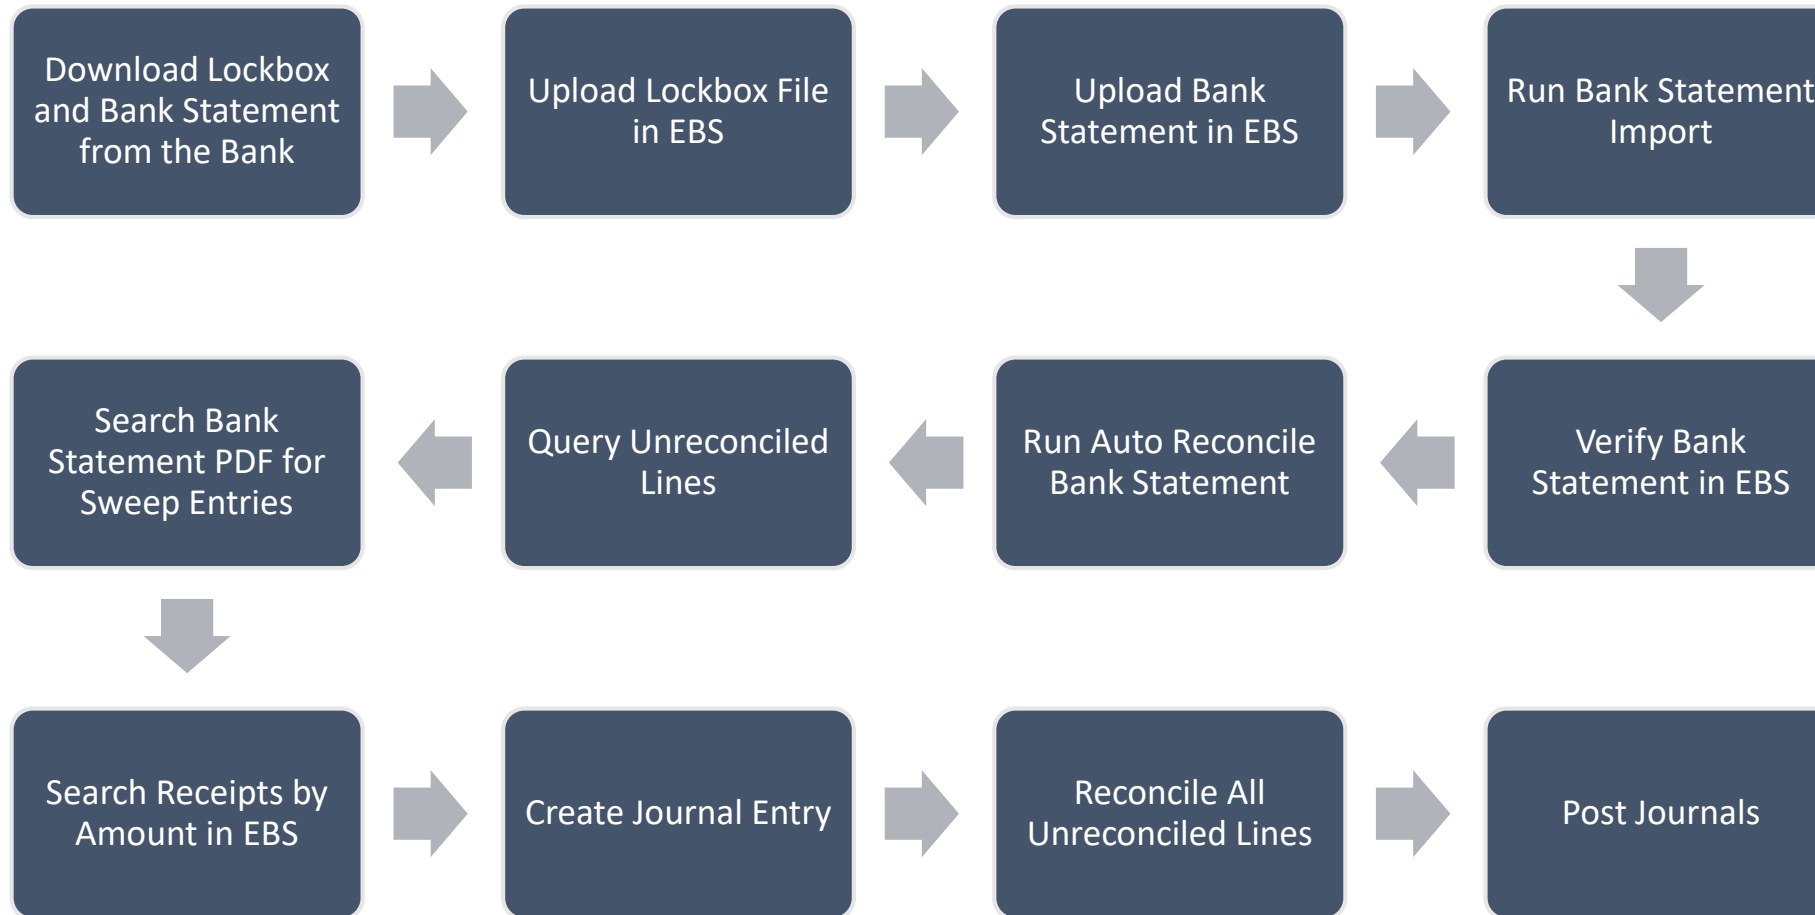

“RPA has been a Win-Win for us.”
- Tom Sheppard, CIO, Brake Parts Inc.

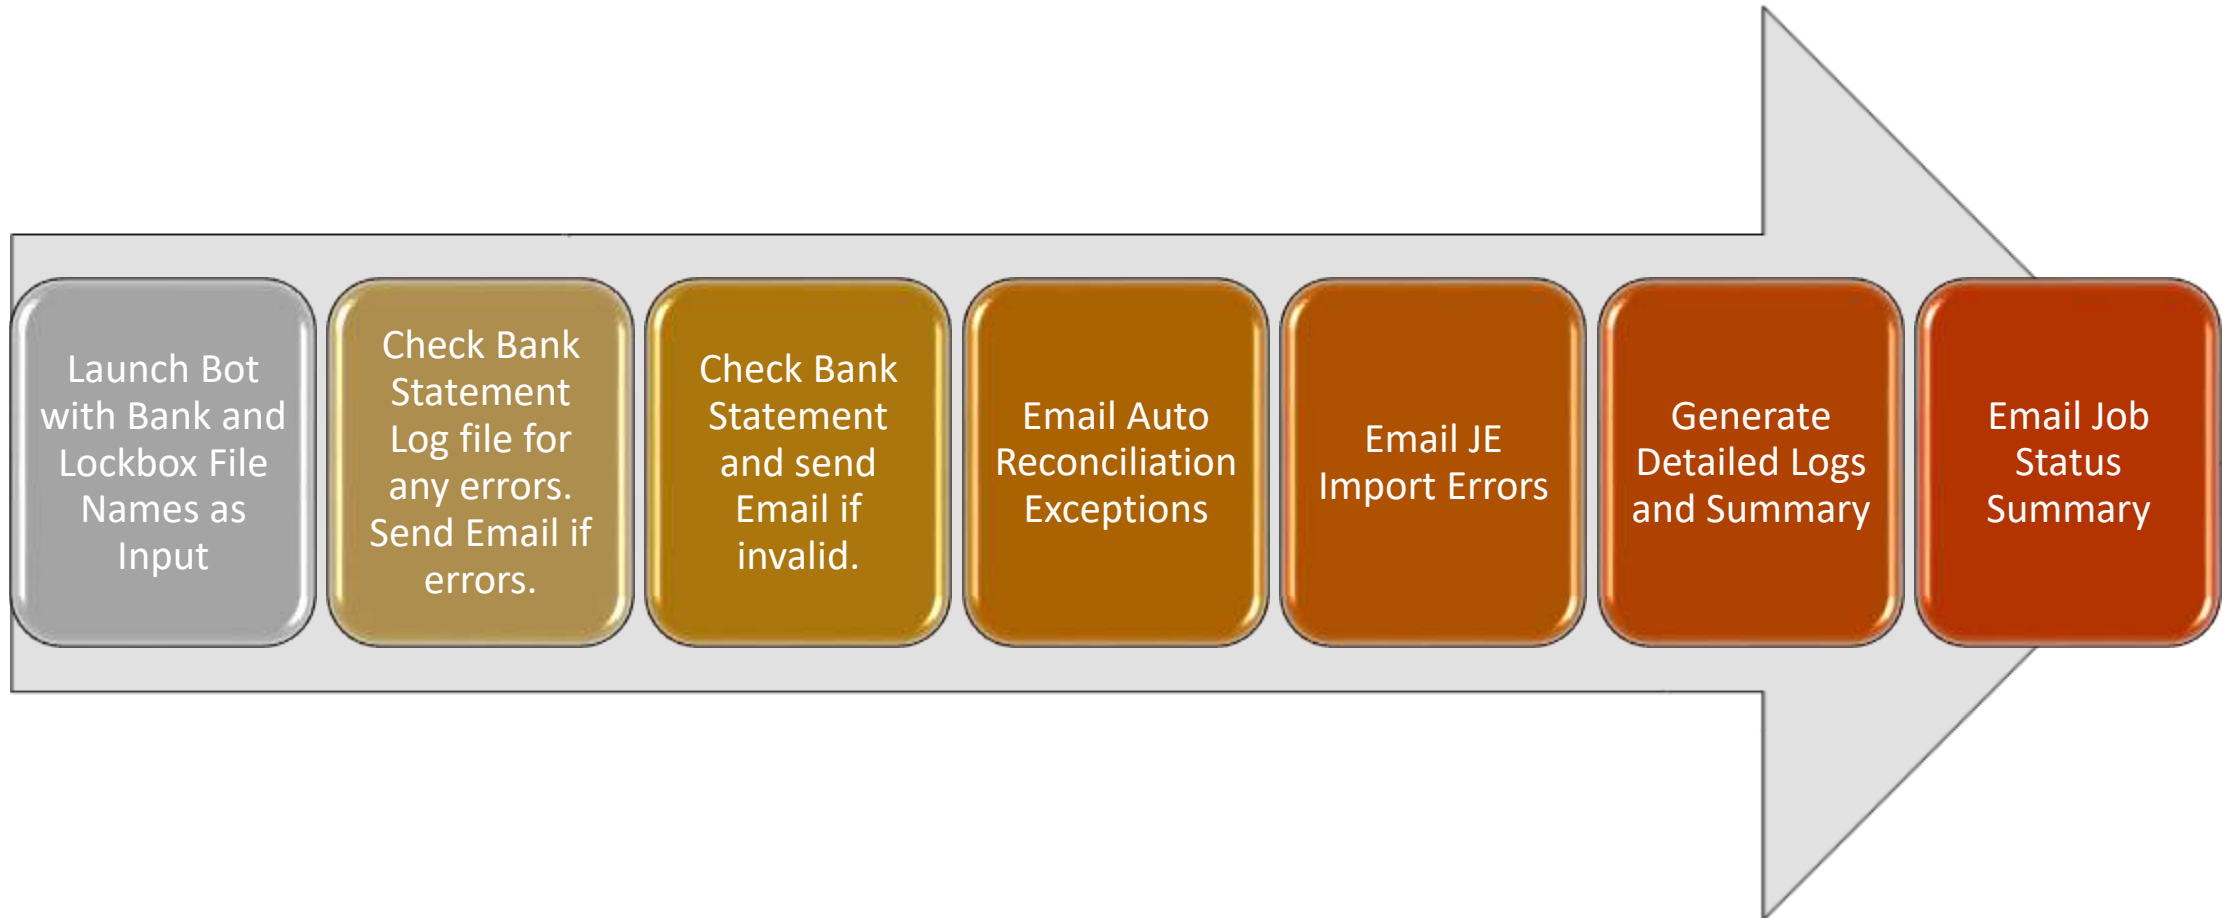

Why Bank Recon Process?

1. Repetitive in nature
2. Number of steps
3. Critical for month close
4. Side stepped for HP tasks

Manual Process Steps

“Bot” Process Flow

Seeing is believing - Software Robot in Action

Implementation Approach

1. IT Work Request
2. Discovery phase
3. Detailed process document
4. Detailed requirement discussion with SME
5. Design review and feedback
6. Development
7. Unit testing, IT testing
8. User acceptance testing (UAT)
9. Parallel run
10. Promotion to Production

Success Factors

1. Executive sponsorship
2. Documented process
3. Review and feedback
4. Good partner
5. Test, test and test

Reactions From Users

Lessons Learnt

1. Timing
2. Testing
3. Selection criteria
4. Education, awareness

Going Forward

1. Order creation from customer portal
2. Journal upload and processing
3. Order line cancellation process
4. Shipment scheduling
